FACTORY FOR BLINDS

Create your visual comfort ...

Horizontal blinds are the most common product used for interior shading. They offer style and light control and visibility at affordable prices. The variety of colors and models, ease of use and maintenance, excellent regulation of light and visibility make venetian blinds an indispensable functional and decorative element in every home and office.

Made of aluminum colored strips with width 16 or 25 mm, which does not fade, and high quality control mechanisms.

ultimate	ultimate MegaView™	ultimate BB24
----------	--------------------	---------------

ultimate MegaView™ – an innovation of Hunter Douglas® is a patented technique MegaView™ with a larger (double) distance between vanes for more daylight and visibility. MegaView™ closes the vanes in the same way as the standard horizontal blinds, but when opened vanes slide and “stick” to each other. You can combine two different colors of strip (specify which color is on top and who is bottom). To be valued at the price of more expensive strip.

ultimate BB24 – blind moves like plisse model BB24 - both profiles are movable. The mechanism for rotating the vanes is built into the profile.

Strips are made of natural wood and are heavier compared to aluminum blinds.

Indicative weight: 25 mm - 2.3 kg / sq.m.; 50 mm - 4 kg / sq.m.

Wooden blinds are a natural product structure and shades of strips can vary. This is a typical effect of natural wood and is not subject to claim.
